

DIEnsemble Season 1

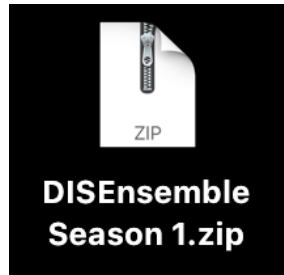

Ableton Live Sample Pack

INSTALLATION INSTRUCTIONS

By Dr. Jason Palamara - IUPUI

*****There are many ways to install a third-party Live Pack, but for the BEST operation of THIS pack, please follow the procedure below*****

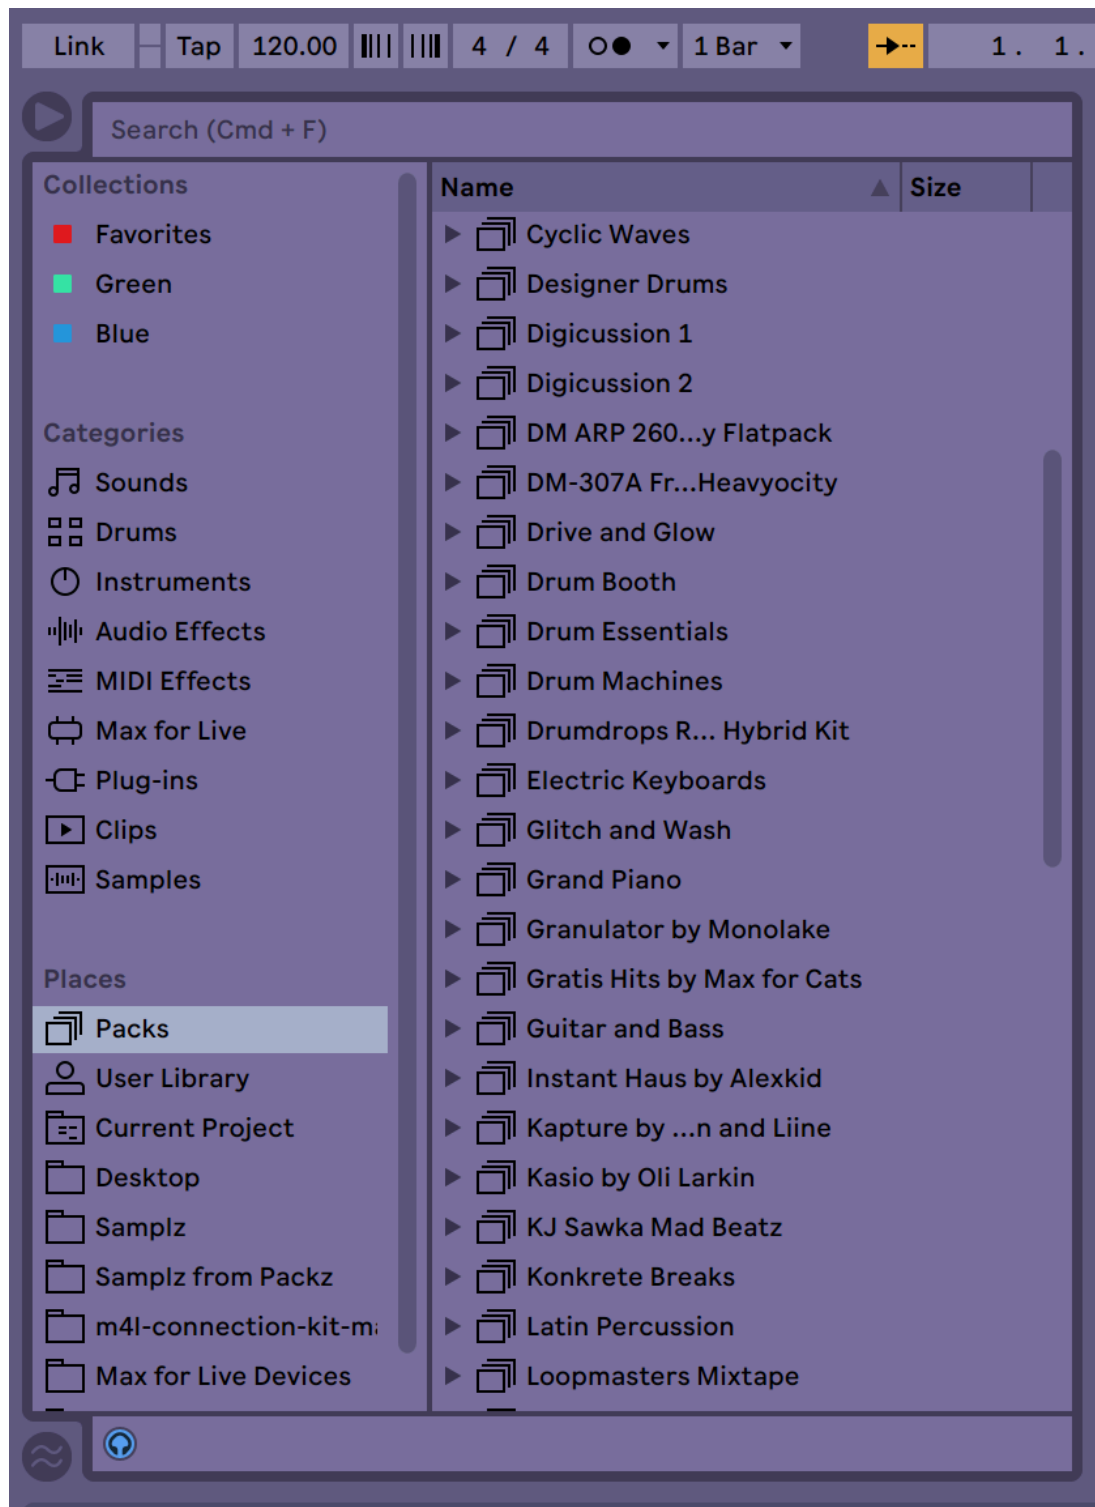

1. Download the project zip file

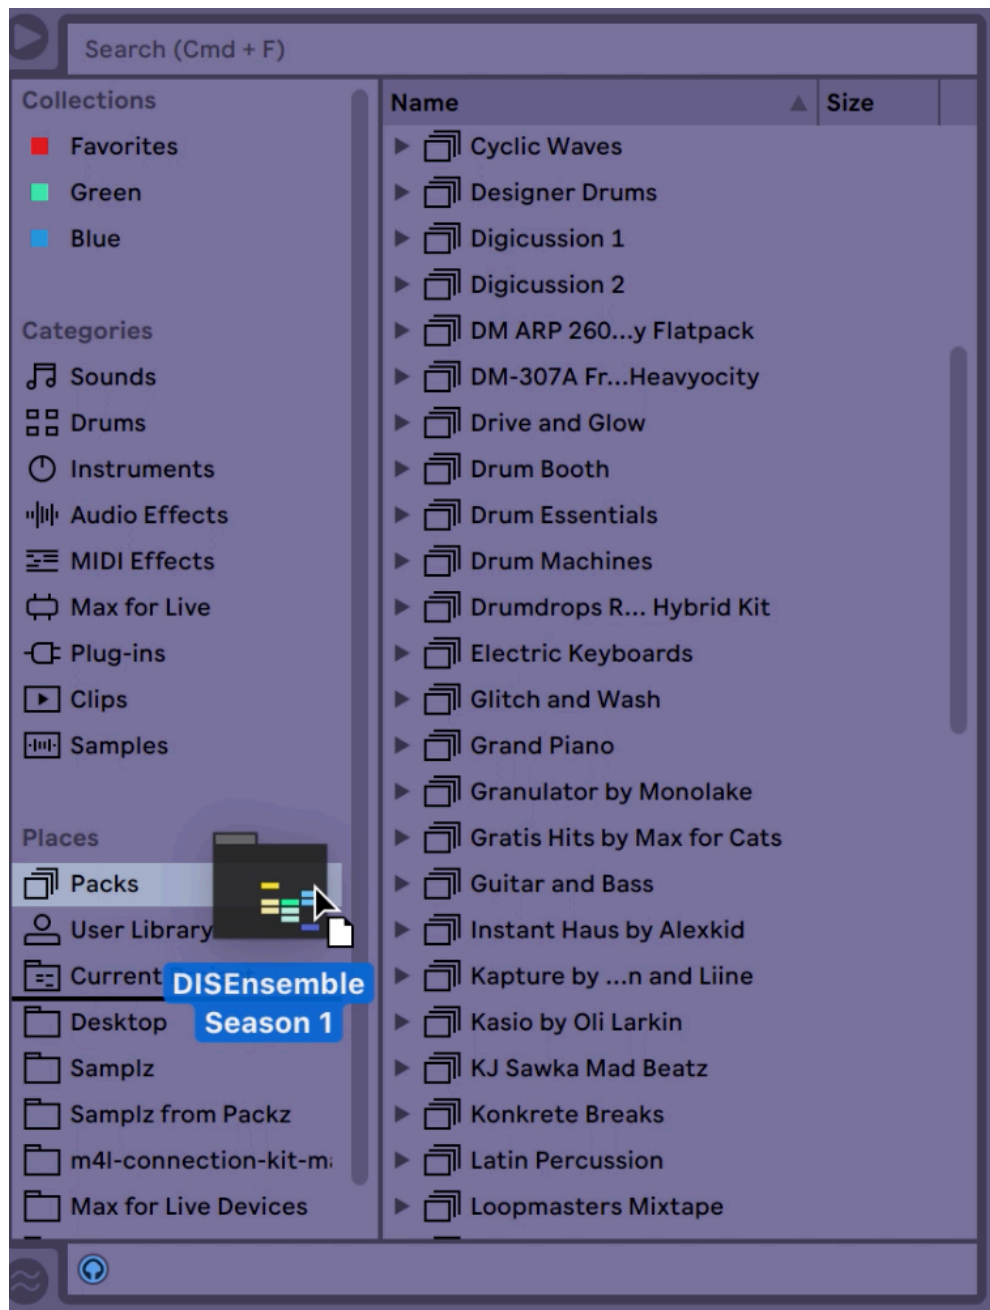

2. Double click on the folder to unzip it

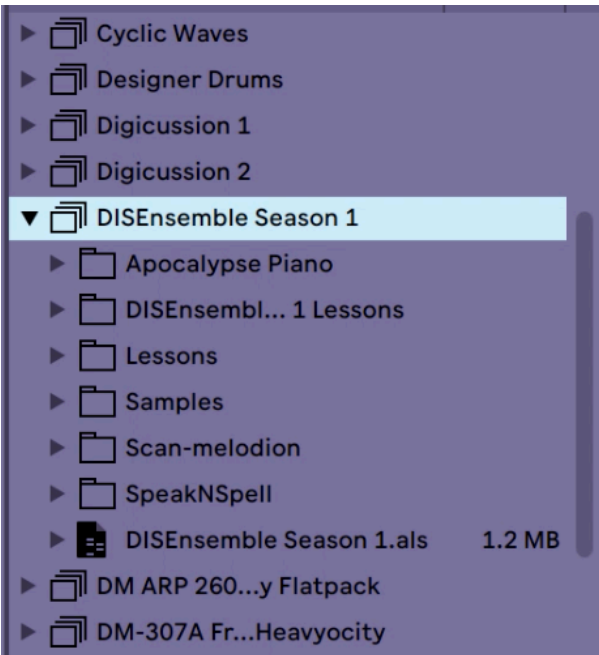

3. Open Ableton Live and access the file browser (on the left)

4. Drag the DISEnsemble Season 1 folder from your Downloads folder (or your desktop, or wherever your computer drops files after downloading) into the “Packs” folder shown in “Places.”

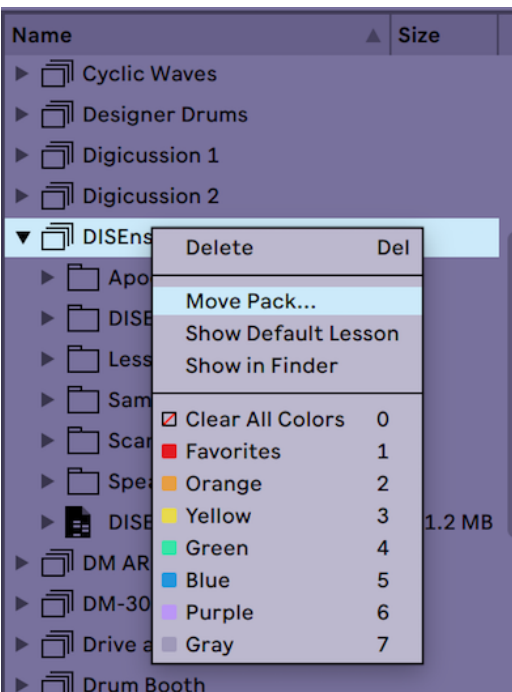

The DISEnsemble Season 1 pack should now appear with the rest of your Factory Packs.

*****The pack will now work...however, read on to discover how to move this pack to a location other than the desktop or downloads folder*****

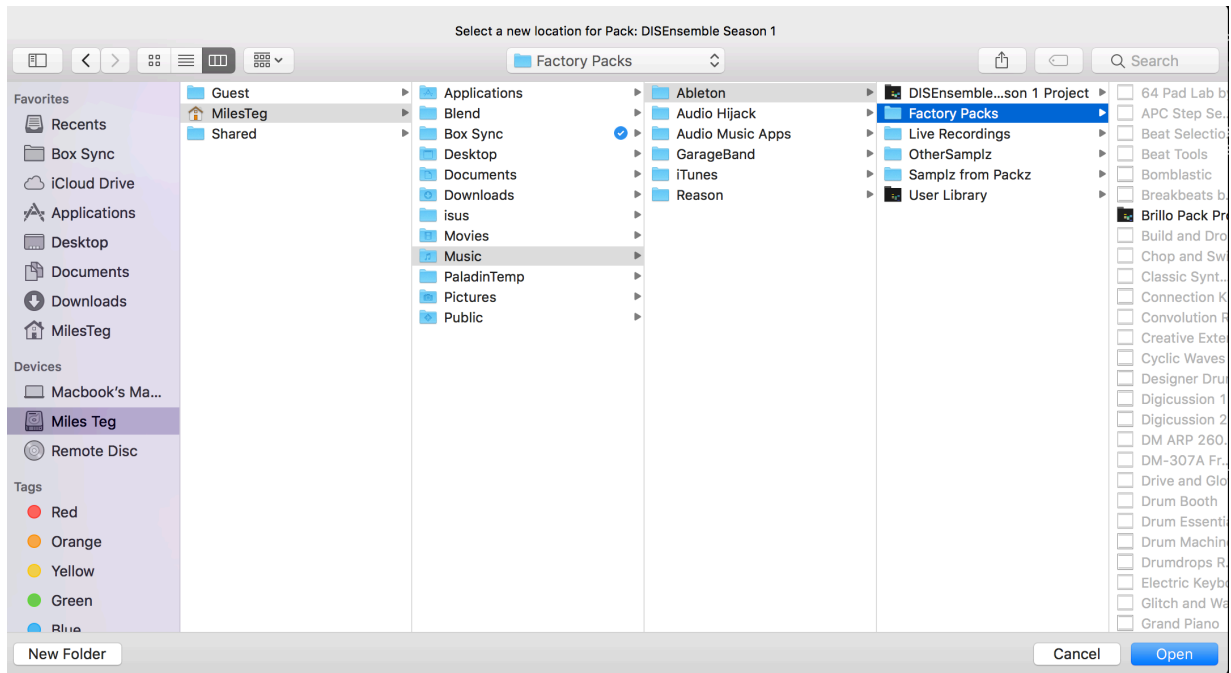

5. Right click on the DISEnsemble Season 1 folder. Click “Move Pack.” A dialog window will appear.

6. Navigate to the place where your Live Packs are stored on your computer. (If you are unsure, right click on a different Pack and which you have already installed and select

“Show in finder (Mac) / explorer (Win).”

(In my own presumably typical case, this is found under Users/(Your user name)/Music/Ableton/Factory Packs...)

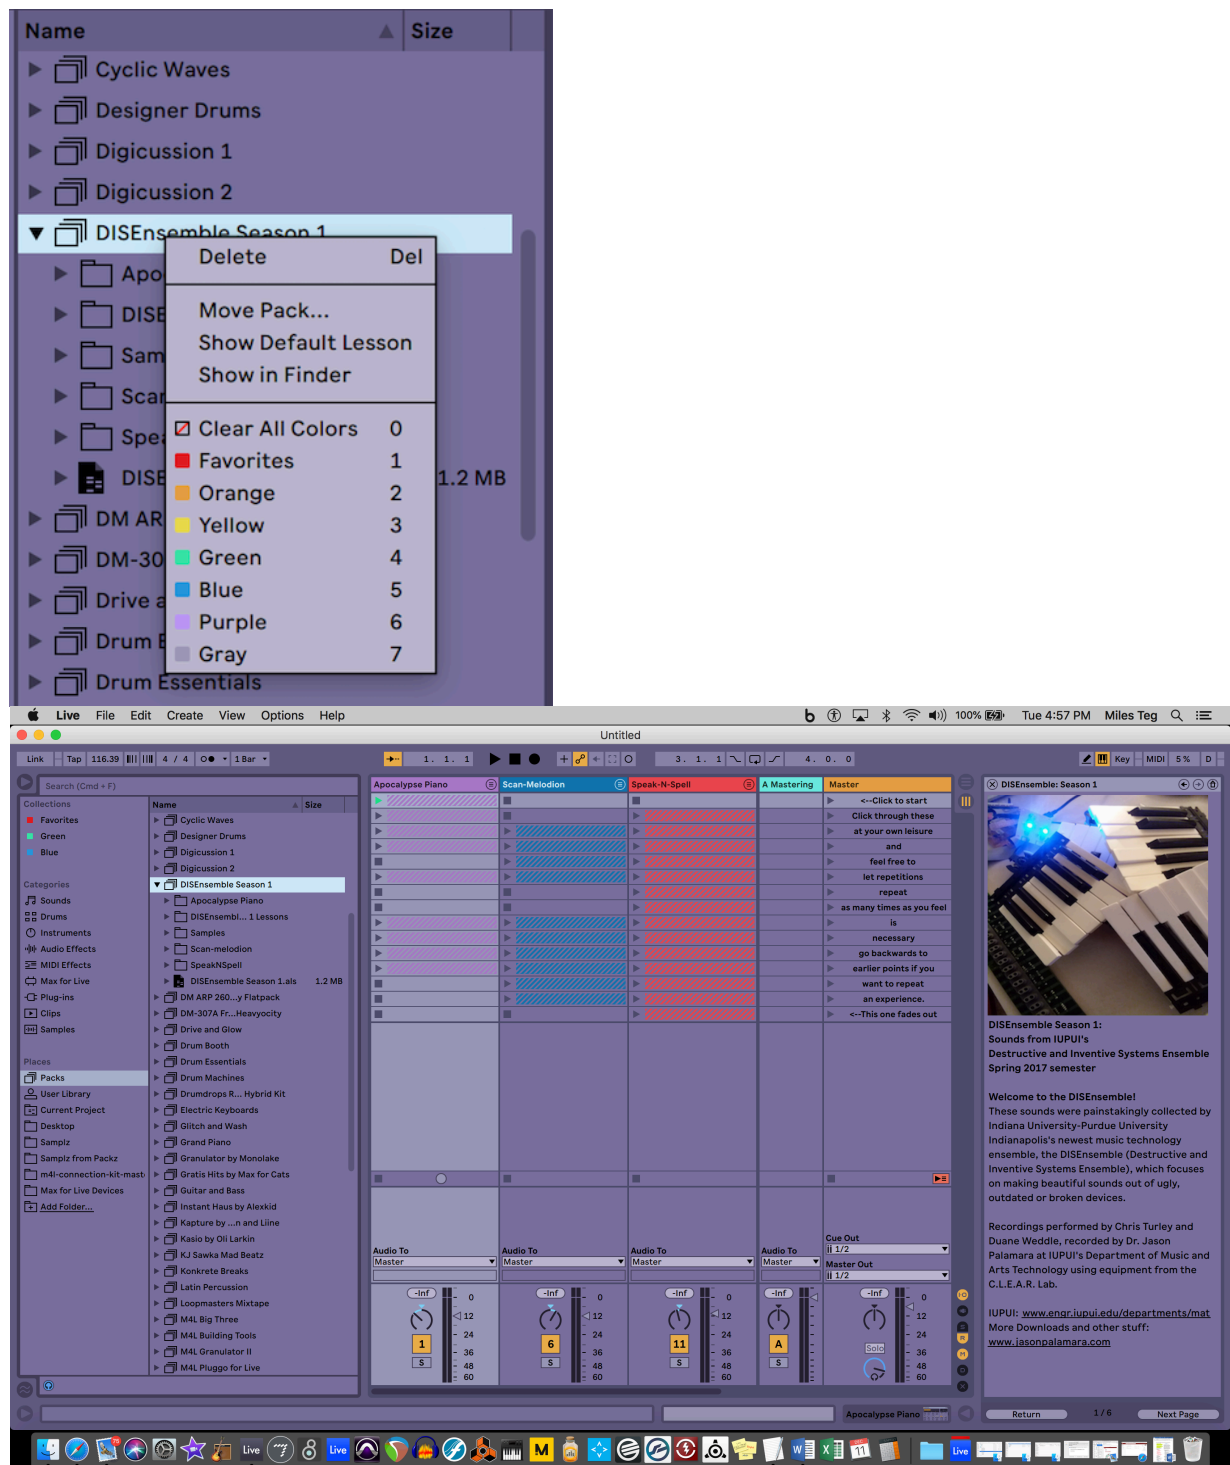

7. Click on **Factory Packs** and hit **OK** to move the pack to the correct folder.

*****The pack will now work and will remain in your Factory Packs folder...however, read on to discover how to view the Demo session and access the Lesson files*****

8. Click on the arrow to access the DISEnsemble Season 1 folder.

9. Double click on the “DISEnsemble Season 1.als” file to view the sample session.

10. Right click on the DISEnsemble Season 1 folder and click “Show Default Lesson” to view the lesson files and read about how the pack was constructed.

11. Click through the demo session to hear some neat DISEnsemble sounds in action!

Happy musicking,

Dr. Jason Palamara
